

YESHASWINI GOGINENI

Beaumont, TX | +1 (409) 812-9123 | yeshaswini9848@gmail.com | [Portfolio](#)

PROFESSIONAL SUMMARY

Network Engineer with 2+ years of experience supporting enterprise LAN/WAN infrastructure using BGP, OSPF, VLANs, and VPN connectivity across distributed network environments. Experienced in monitoring and troubleshooting network performance using SolarWinds, NetFlow, Wireshark, and tcpdump to maintain service reliability and reduce incident resolution time. Hands-on exposure to hybrid cloud networking using AWS VPC and Azure VNets, along with endpoint compliance support using Microsoft Intune, SCCM, and MECM. Familiar with Python and Ansible for basic automation and skilled in documenting network topology and operational procedures to support infrastructure teams.

TECHNICAL SKILLS

Networking & Protocols: LAN/WAN, TCP/IP, IPv4/IPv6, VLANs, BGP, OSPF, MPLS, STP, RSTP, NAT, IP Addressing, Subnetting.

Network Security & Connectivity: Cisco ASA, Palo Alto, IPsec VPN, SSL VPN, Access Control Lists (ACLs).

Endpoint & Infrastructure Support: Microsoft Intune, SCCM, MECM, Endpoint Compliance Support, Patch Management.

Cloud Networking: AWS VPC, Transit Gateway, Azure Virtual Networks (VNets), Route Tables, Security Groups, ExpressRoute.

Monitoring & Troubleshooting: SolarWinds, PRTG, NetFlow, Wireshark, tcpdump, Ping, Traceroute, Nslookup, Network Troubleshooting.

Automation: Python, Ansible.

Infrastructure Platforms: Cisco IOS, Cisco NX-OS, Juniper JunOS.

Documentation & Operations: Visio, Lucidchart, Network Diagrams, Runbooks, Incident Management, Change Support.

PROFESSIONAL EXPERIENCE

Associate Network Engineer

Jan 2021 - Jul 2023

Techecy | Hyderabad, India

- Provisioned VLAN segmentation and structured IP addressing strategies across campus switching environments improving secure traffic isolation for 4 departmental network zones and reducing broadcast domain overlap.
- Maintained OSPF adjacency health and monitored route redistribution behavior improving route propagation consistency across multi-layer enterprise switching infrastructure during network changes.
- Supported SCCM-driven patch deployment coordination with systems engineering teams improving compliance visibility and maintaining patch alignment across 180+ enterprise Windows endpoints.
- Analyzed network latency patterns using PRTG and SolarWinds dashboards identifying performance bottlenecks and reducing recurring service-desk escalations by nearly 20%.
- Collaborated with firewall administrators to maintain IPsec VPN tunnel availability between branch locations improving inter-site communication stability for remote operations teams.
- Validated Azure VNet route table alignment during hybrid connectivity integration ensuring stable communication between on-prem infrastructure and cloud-hosted workloads.
- Investigated packet-level anomalies using Wireshark and NetFlow accelerating troubleshooting resolution and minimizing downtime for intermittent WAN application connectivity issues.
- Produced Lucidchart-based topology diagrams and structured runbooks strengthening cross-team incident coordination and improving readiness during infrastructure upgrade activities.

PROJECTS

Cloud-Native Network Infrastructure & Traffic Management Platform

- Designed hybrid cloud routing using AWS VPC Transit Gateway and Azure ExpressRoute enabling resilient communication across multi-network enterprise workloads and improving cross-environment connectivity stability.
- Configured AWS route tables and security groups across segmented subnets improving controlled east-west traffic flow and reducing unnecessary network exposure between application tiers.
- Validated hybrid connectivity using packet-path testing and failover scenarios improving reliability visibility and ensuring consistent routing behavior across cross-cloud communication environments.

Enterprise Endpoint-Aware Network Compliance & Patch Visibility Integration Lab

- Configured VLAN segmentation and OSPF-based routing using Cisco IOS environments improving traffic isolation and ensuring structured communication across departmental access network zones.
- Established Remote Access VPN using Cisco ASA enabling secure authenticated connectivity for distributed endpoints across segmented branch network environments.
- Documented network topology and routing paths using Visio improving change validation readiness and strengthening cross-team infrastructure understanding during deployment planning.

EDUCATION

Master of Science in Computer Science

Lamar University | Beaumont, TX

Bachelor of Technology in Computer Science

Jawaharlal Nehru Technological University | India

CERTIFICATIONS

- Cisco Certified Network Associate - **CCNA**
- CCNP Enterprise - **In Progress**
- Enterprise Architecture: Familiar with TOGAF framework concepts and enterprise architecture principles
- Google IT Support Professional Certificate - **Coursera**
- IBM IT Support Professional Certificate - **Coursera**
- AWS Fundamentals Specialization - **Coursera**
